FILM FACED/MARINE PLYWOOD

Marine plywood is an exterior plywood used in building and construction projects. It has a special film coating on its surface made from phenol or melamine on either or both sides which gives the plywood a higher resistance to moisture, abrasion, chemical degradation and fungal attack compared to ordinary plywood. Film faced plywood is also called formwork plywood, shuttering plywood, concrete form. Film faced plywood is the special plywood with two sides coated with wearable and waterproof.

Origin

CHINA

BENDY PLYWOOD

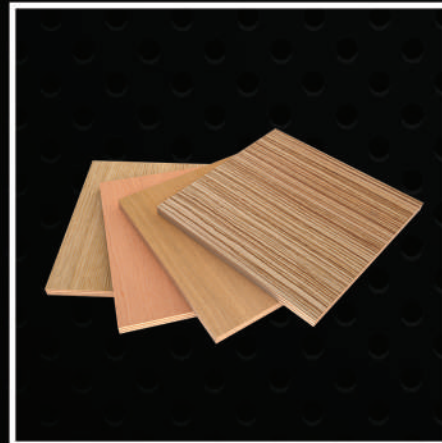

Bendy Plywood is one of the best flexible plywood panels on the world market. The high performance, flexible characteristics of BBS Bending Plywood give shape to almost any curved contour. The plywood flexes easily at a minimum radius of 200mm & even smaller radii when additional force is applied.

VENEER PLYWOOD

Veneered plywood is the plywood base decorative panel. We also name it wood veneer faced plywood. The species of core veneers are rotary cut from Teak, Mahogany, Ash, Oak, Maple, Walnut and Cherry woods logs. However, the species of face/back veneer can be wood or non-wood. Veneer plywoods are the common kind of plywood and are widely used for furniture, construction, packing, DIY and decor works. The glue for veneer plywood can be MR glue or WBP glue. MR plywood is for interior use.

WBP/MARINE PLYWOOD

WBP plywood stands for Water Boiled Proof plywood. WBP plywood is a high-grade veneer plywood made with waterproof glue. It is deference with marine plywood in terms of the core voids requirements. WBP plywood panel will be exposed to weather, water and moisture for a long period (some maybe permanently) without delamination. WBP plywood is designed for outdoor uses such as house building, shelters & covers, roof, container flooring, concrete shuttering, etc.

COMMERCIAL PLYWOOD

The commercial plywood is the standard plywood. The commercial plywood is usually a grade of plywood that is quite cheap because it is manufacturer out of veneers or slices of woods called the ply which is glued or bonded together under high pressure. Commercial plywood is the most widely used plywood for interior decoration, namely home and office. Commercial plywood is best used in dry areas like living rooms, study, office, etc. This is the most common used to make furniture, wall panels, for dividing, and more.
